### **1280-II ATLAS**

Dining table of natural stone with or without lifting mechanism  
Design Georg Appeltshauser 2006/ 2014/ 2018

ATLAS - in Greek mythology, the giant carried the weight of the world! Our table of the same name also has great load-bearing capacity - but exudes an elegance that is the result of the balanced proportions. The legendary stone park offers 150 different types of natural stone from all over the world. The customer selects his slab and determines the cutout from which a unique DRAENERT piece of furniture is made. Patented technology makes enlarging child's play.

An extensible, rectangular dining table made of natural stone wood that convinces by its modern strictness. Thanks to the extension mechanism the symmetry with the substructure is always maintained in the extended as well as the closed position. With a new technique the extension leaf can be rotated by another 90°. Thus, it is now positioned lengthwise under the center leaf and is no longer visible from the side. This model is offered with 3 different bases.

FUTHER INFORMATION: e.g. dimensions and material variants under "technical details"
