## DESCRIPTION

Can a table radiate both calm and dynamism? It's possible - if creativity, expressiveness and a feeling for proportions and details match perfectly. The state-of-the-art skills and many years of experience of the designer Wolfgang C.R. Mezger come into play here. Our STAN table demonstrates a distinctive sense of form and surprises with its lightness. Its oak top is available in lengths between 200 and 280 cm. It almost seems to be floating on the two dynamically crossed legs, which rest solidly on a black base plate.

A sculptural design - timeless and beautiful.
