

## **ADLER dining table – 30 years of timeless elegance**

In the 90s, more precisely in 1995, the company founder Dr. Peter Draenert created a masterpiece that quickly became a bestseller and a classic in the DRAENERT collection. His goal was to create a dining table that could be expanded with ease - inspired by the majestic elegance of an eagle soaring into the sky.

The result is a sophisticated extension mechanism that continues to set standards today and is unparalleled. With a single movement of the hand, the table tops made of natural stone or solid wood can be easily enlarged - flexible and suitable for the respective occasion. A table becomes a spacious table in no time.

The formal versatility of the ADLERS is limitless. It is available in over 150 types of natural stone as well as in different types of wood, shapes and sizes. Whether minimalist style or opulent elegance - this table fits seamlessly into different interior styles. The ADLER embodies the quintessence of German design: complex functionality, aesthetic design and lasting value.

The ADLER stands for perfect craftsmanship and fascinates customers worldwide - from Europe to America to Asia - with its perfect technology, which is the basis of numerous DRAENERT patents.

These design classics are manufactured with the utmost care in the modern DRAENERT factory on Lake Constance. Quality, precision and exclusivity characterize every detail. The ADLER is not just a piece of furniture, it is an expression of personality and style. An ADLER table enriches the avant-garde loft in Manhattan as well as the classic villa in the Swiss Alps.
