# ASSEMBLY

## 1212 WHY NOT

### CONTENT OF DELIVERY

(remains with the customer)

- 1 glass top
- 4 tubular legs
- 4 screws
- 4 glides
- 1 assembly key long
- material information

### PERSONS REQUIRED FOR ASSEMBLY: 1 PERSON

#### ASSEMBLY

Put the glass top with the metal support parts upwards on a clean and soft surface. Screw the tubular legs on the metal support parts and insert the included glides into the tubular legs.

**ATTENTION** Do not overtighten the screws, as the metal support part can be deformed and may get detached from the glass top. Do not press in the glides with too much force, as the glass top may break in the corners.

Turn over the table and put it carefully on the legs.

**ATTENTION** While turning the table the table legs shall not touch the floor.

The table is now ready assembled.

#### INSTRUCTIONS FOR MOVING THE TABLE

In case of moving the table, lift the table with 2 persons at the glass top and the legs may not touch the floor while carrying it.

#### REMOVAL

For a removal, the glass top must be transported upright standing. It is recommendable to unscrew the legs.

Further information on the back side.

## HAFTUNGSAUSSCHLUSS

Es handelt sich bei diesem Modell designbedingt um einen zierlichen, empfindlichen Glastisch, auf dessen Beine man keinerlei Druck oder Schlag ausüben sollte.

Tritt man gegen eines der Beine, kann sich das Klebeteil lösen oder gar die ganze Glasplattenecke abbrechen.

Äußerste Vorsicht beim Aufstellen!

Den Tisch nicht verkanten und nicht über den Boden ziehen. Ein ruhender Glastisch ist jedoch so unempfindlich wie alle anderen Glastische auch.

## PFLEGE

Der Tisch ist wartungsfrei. Für die Pflege der Glasplatten können Sie bei uns ein DRAENERT-Reinigungs- und Pflegeset für hochwertige Glasoberflächen bestellen. Beachten Sie hierzu bitte die Materialinformationen!

## LIABILITY EXCLUSION FOR GLASS TABLES

Due to its design this model is a delicate, sensitive glass table. Its legs shall not be exposed to pressure or impacts. If the legs are knocked, the metal support of the glass plate could break off.

It is absolutely recommended to exercise extreme caution during the assembly! Do not tilt the table and, furthermore, do not pull it along over the floor. When the glass table is safely standing, it is as practical as any other glass table.

## CARE

The table is maintenance-free. For cleaning the glass plates you may order with us an according cleaning and care agent for high-quality glass surfaces. Kindly pay attention to the material information!
