### 1460 FONTANA

Dining table of stone with or without extension mechanism  
Design Georg Appeltshauser, Gino Carollo 2014

The dining table FONTANA is equipped with a patented, state-of-the-art extension mechanism of the DRAENERT manufactory. A fully automatic mechanism allows to extend or minimize the table synchronously without changing one's position. In doing so, the integrated three-fold extension plate moves out effortlessly. The trapezoidal top matches perfectly with the different base versions.

The legendary stone park offers 150 different types of natural stone from all over the world. The customer selects his slab and determines the cutout from which a unique DRAENERT piece of furniture is made. Patented technology makes enlarging child's play.

FURTHER INFORMATION: e.g. dimensions and material variants see "data sheet"
