1280-II ATLAS

Dining table of natural wood with or without extension mechanism
Design Georg Appeltshauser 2006/ 2014/ 2018

ATLAS - in Greek mythology, the giant carried the weight of the world! Our table of the same name also has great load-bearing capacity - but exudes an elegance that is the result of the balanced proportions. Its oak or wild oak top is available in four different colors or in American Walnut. Patented technology makes enlarging child's play.

As special feature, the base, which consists of brushed aluminum side walls, always maintains its symmetry, regardless of whether the table is closed or extended. If one emphasizes on such minimalist overall appearance, such details are important. The integrated pivotable leaf is located under the top and can easily be extended through a 180° rotation. Two different bases with various surface finishes are available for this model.

FURTHER INFORMATION: e.g. dimensions and material variants see "data sheet"
