1600 coffee table

70 x 120 x 38  
90 x 90 x 38

**Description:**

NURGLAS tables are made from float glass bent at 800°C.  
This glass bending is technically demanding.  
The extreme temperature affects the appearance of the glass.  
An "orange-peel" surface or rainbow effects may well be seen.  
Finely frosted areas and small scratches, bubbles or dents are also unavoidable and cannot be regarded as a cause for complaint.  
All tables undergo a thorough quality inspection by experts and within strict limits.  
As this glass bending is a highly skilled manual operation, no two tables can be alike. Small dimensional deviations are possible.  
Please kindly consider these circumstances.

**No special sizes, shapes and materials available!**
