

# BLOW

---

Model No. 1377

## DESIGN STEPHAN VEIT

The BLOW side table combines two materials perfectly: stone and glass. The pedestal made of natural stone grounds the table and is the ideal counterpart to the table top, made of hand-blown glass manufactured in a complex process. The liaison of these two - at first glance - contraire materials appears effortless and almost selfevident. This exciting contrast between the table top and the table base creates a particular style element. The glass body, whether transparent or light gray or purple translucent offers exciting vistas.

Model type	Base	Size
	stone base	W - L - H approx. in cm

Glass cone	Glass cone
hand blown amethyst	hand blown amber

1377 side table	Nero Marquina polished	36 ø x 50 48 ø x 42
-----------------	---------------------------	------------------------

1377 side table	Calacatta Gold polished	36 ø x 50 48 ø x 42
-----------------	----------------------------	------------------------

**Caution:**

**The side table may under no circumstances be used as a stool.  
Risk of breakage in case of tipping!**

maximum weight 40 kg

**Description:**

The glass cones are pipe-blown by hand. Therefore, bubbles of up to 4 mm, mechanical and optical distortions as well as dimensional deviations are unavoidable.

All tables undergo a thorough quality inspection by experts and within strict limits. As glass blowing is high grade manual work, no table can be identical to any other table. Small dimensional deviations are possible. Please kindly consider these circumstances.

**No special sizes, shapes and materials available!**
